

## Construction Summary

### General Reasoning (Cognitive)

Slower Processing  
Accepts Simple & Repetitive Work

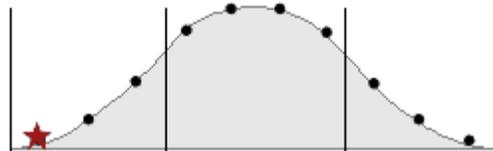

Faster Processing  
Needs Intellectual Challenge

- Jay tends to solve problems and learn new information more slowly than others
- Should be allowed more time for initial training and for learning new procedures and job requirements
- Typically capable of dealing with routine issues without becoming bored which can be very beneficial in many construction worker positions where it is necessary to stay focused on immediate tasks

**Question:** Tell me how you have learned a new job in the past. How were you trained?

### Conscientious (Organization)

Carefree  
Impulsive

Detail Oriented  
Dependable

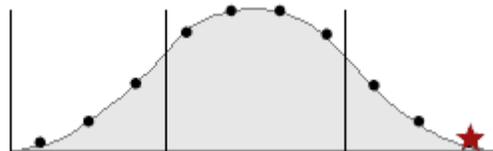

- Jay may miss important details
- May appear to be careless and unorganized which can prove to be problematic in many construction environments
- May be better suited for positions that value spontaneity and ability to handle issues as they arise
- Jay will typically handle interruptions during the day better than most people

**Question:** Some jobs require that you deal with a lot of details during the day. Describe a time when you had to deal with a lot of details and you forgot something important. What happened?

### Tough Minded

Cooperative  
Agreeable

Direct  
Determined

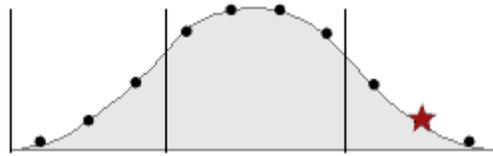

- Jay tends to be tough-minded and out-spoken
- This directness can be helpful when they voice feedback and offer opinions for solving construction issues
- Can become argumentative with others particularly when they are not in control or in charge
- Jay may have difficulty taking direction from others which can create issues within some construction environments

**Question:** Describe a time in a job when you have gotten into an argument with someone over how a particular task should be handled. What happened?

## Conventional (Rules)

Open to New Experience  
Flexible

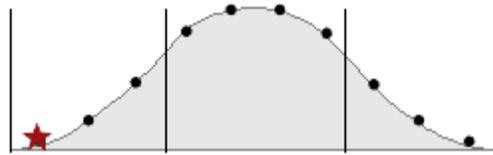

Consistent  
Structured

- Tends to be very consistent in following construction policies and safety procedures
  - Jay may find it difficult to deal with change and will need extra time to adapt to changes made in construction procedures
  - May be better suited to environments where the problems are more predictable in nature rather than dealing with new types of problems on a regular basis
- Question:** Tell me about a time when there were a lot of changes in your job and it became frustrating. What was the situation and how did you deal with all of the changes?

## Extroversion

Reserved  
Listener

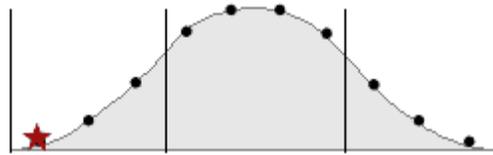

Outgoing  
Talker

- Jay tends to be quiet and shy which can work well for many construction environments where employees must work for long periods of time on their own
  - Others may view Jay as unfriendly or aloof
  - Tends to have good listening skills
- Question:** Describe a time when you had to work and interact with people a lot during the day. How did you deal with it?

## Stable

Sensitive  
Anxious

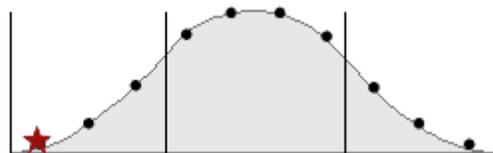

Calm  
Stress Resistant

- Jay is usually sensitive to design specifications which can be beneficial in some construction environments
  - In highly stressful and demanding construction environments, Jay may become nervous and anxious
  - May be better suited for situations where there is less stress and where sensitivity is valued
- Question:** Many jobs are really stressful and demanding. Tell me about a time when your job was very demanding and because you had to work so fast, you were not able to completely follow a policy or safety procedure. What was the situation?

## Team

Individualistic  
Competitive

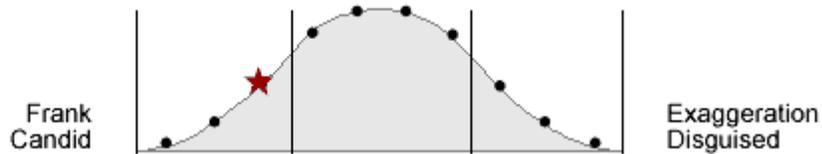

Collaborative  
Win-Win

- Jay is generally competitive and self-confident
- May have difficulty working on a team and being collaborative
- May be better suited for an environment where they are allowed to work independently rather than one where they are expected to continually be a part of a team effort

**Question:** Tell me about a time when you were particularly motivated to do your job every day. What was the situation and how were you rewarded for your efforts?

### Good Impression (Social Desirability)

- Jay's responses have been frank and open

\*The participant has scored  
in the "red zone" in 1 area.

Overall  
**75% \***
